Worksite Incident Reporting

There's an old saying: "Bad News does not Age Well". All organizations rely on the continual flow of accurate information in support of appropriate responses and timely decision-making. This maxim is of particular significance in the workplace, where the slightest delay in incident reporting, or an incomplete assembly of facts collected can and will considerably drive-up the costs associated with a Workers' Compensation claim, utility strike, or safety event.

The construction industry presents even greater complexities and unique challenges, as a result of:

- Remote work sites and concurrent projects
- Potential subcontractor involvement
- Diverse employee groups with varying levels of skill

Compatica has been designed by industry experts to prevent the negative outcomes of delayed and inaccurate Workplace Incident reporting, namely upwards-spiraling claims costs, opportunities for fraud, contentious utility damage claims, and avoidable legal actions. By implementing a point-of-occurrence incident recording app in employees' mobile devices, authorized users can report a variety of events in real time, including incidents such as:

- Injuries
- Property, Liability, Utility Strikes
- For Record Only
- Near Misses
- Safety Observations

At Compatica we contend that "delays equal dollars", and that collecting and transmitting information within the first four hours post-incident is critical to proper disposition and resolution. True, not all incidents result in injuries or claims, but successful organizations establish mechanisms for transparent and timely reporting of all variances, as the single most significant measure to reduce incidents, enhance damage prevention, and limit severity.

COMPATICA
On the job

Onsite Incident Recording in the Palm of your Hand

Compatica places an intuitive, obvious-use app right in the Supervisor's smartphone and the Superintendent's tablet, facilitating on-the-spot accurate and comprehensive Workplace Incident reporting, right there at the worksite. Functionality includes:

- Immediate Incident Notifications
- Complete Event Intake
- Audio Recordings
- Pictures
- Safety Observations and Near-Misses
- E-Signed Attestations & Waivers
- Incident Locations, Zones, and Equipment
- Witness Statements
- Referrals to Approved Clinics
- Data Required for FROI, OSHA, and all forms
- Offline Operation - Connection not required
